## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1,4-6,8-10, 13-15,17-22 rejected under 35 U.S.C. 103(a) as being unpatentable over Lee et al 307 or Sekoguchi et al 271. Note that both patents cited disclose electrode means having a gap and generation of ions and electrons in the gap. The frequency is selected by the user and barring further description of how the concentration of the particles is governed relative to gap center, it is submitted that both patent teach positive and negative ions which do appear at the center of the gap.

***Response to Arguments***

Applicant's arguments with respect to claims 1-22 have been considered but are moot in view of the new ground(s) of rejection. Note that the re3jected claims make no mention of the concentration of ions in the gap center.

***Allowable Subject Matter***

Claims 2,3,11,1219 are allowed. Claims are allowable for the reasons stated in the prior office Acton.
